DOCman

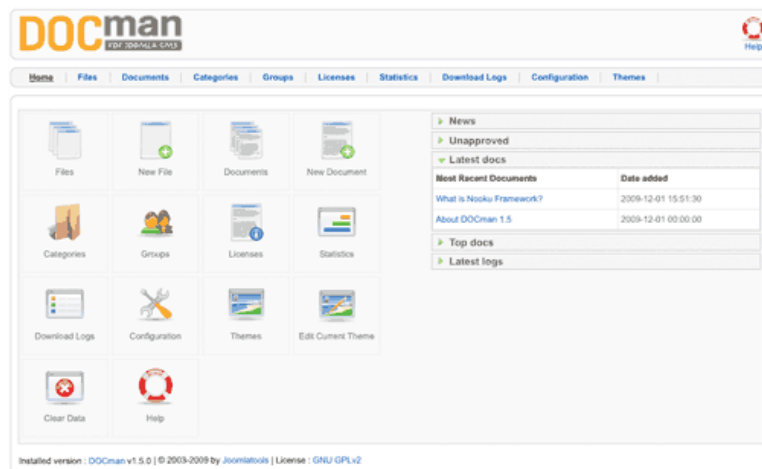

DOCman is a **document and download manager** for Joomla. DOCman makes offering downloadable documents on your Joomla site a breeze.

Manage documents across multiple categories and subcategories, give users permission to upload, download or edit documents. Store documents either locally or remotely and prevent direct linking using our build-in anti-leech system.

All from within an intuitive and simple to use administration interface.

Join now! only \$69 yearly

or [Learn more](#)

Key Features

Nested Categories

Organize documents across custom infinite categories

Local or Remote Storage

Files can be hosted locally or on a remote server

Statistics

Track downloads per document and log all download

Custom Groups

Documents can be owned by a specific group of users

Flexible Themes

The layout can be changed using custom themes

Integrated Search System

Document search is seamlessly integrated within Joomla
